## Orders in foreign currency

When you give a buy or sell order for an investment product in another currency, the bank converts the value of the order into euros. For this, we use the middle rate prevailing at the time of conversion plus or minus a certain percentage, depending on the currency. This incorporates the costs that ABN AMRO incurs to hedge and convert the foreign currency. For more information on the method of calculation and the main surcharges and discounts, please go to [abnamro.nl/ordervreemdevaluta](http://abnamro.nl/ordervreemdevaluta)

## Ongoing charges figure

The ongoing charges figure (OCF) gives an indication of the costs incurred by an investment fund. It comprises the annual management charge and additional expenses such as legal fees, auditor's fees and other operating expenses. Non-paid interest is generally included as well. The investment fund calculates the ongoing charges per share class over a twelve-month period and this is automatically assimilated into the share prices of the investment fund. The OCF is a constituent of the Key Investor Information Document (KIID) published by the investment fund.

The KIID can be viewed at [abnamro.nl/fondsen](http://abnamro.nl/fondsen) under the product information on the investment fund.
